
Beyond our games, use the Gamepad Emulator (only available on PC) to turn your bike into a virtual joystick, keyboard, and mouse to play popular games. Configure your own mappings or use the ones we've made for Project Cars, EVE Valkyrie, and Radial-G. If you're a developer, from homebrew to AAA, add VirZOOM bike and motion controls to your games for free with our Unity SDK.

The VirZOOM Bike

Actively experience virtual reality with the VirZOOM Bike Controller, priced and sized for home use by the whole family. Now try it with a 30-day money-back guarantee.

Integrated sensors in the bike track your pedaling speed forward and backward. Not just cadence but the responsiveness you require for high performance gaming. Triggers and buttons are built into the grips to take air, get bursts of speed, and blast away obstacles. Lean on the bike to steer naturally using your VR system's position tracking—our extra wide base keeps you planted!

Choose the pedaling resistance that suits you to increase your score or speed or difficulty in our games. Heartrate sensors in the grips determine the calories you burn on every ride.

The bike operates silently to be able to hear your games, and folds up easily to move in and out of your play area. 2 AA batteries power it for months to communicate wirelessly to your VR system without cords.

VR System Not Included

You must have your own VR system to play VirZOOM, but luckily it is compatible with all major systems having position tracking:

Oculus Rift (with acceptable PC)
HTC Vive (with acceptable PC)
Windows Mixed Reality (with acceptable PC)
PlayStation VR (with PS4)

Title: VirZOOM Arcade
Genre: Action, Adventure, Casual, Indie, Racing, Sports
Developer:
VirZOOM
Publisher:
VirZOOM
Release Date: 30 Jun, 2016

As an old game with relatively bad graphics, this is my childhood game so I recommend it.. So the idea of the game isn't anything new and you have tons of games like this so that is a big minus in spite of finding something new thes days is very difficult.

It has some improvements like 1-2 Shots one kill or awesome Head Shots but as interesting as they should be.

The shooting and the movement in the game work fine except for few bugs that i'm pretty sure are going to be fixed.

The maps are average, nothing impressive but they do their job fine.

The Classes are like in a regular shooter, nothing special but I think they'll add some more.

And if I recommend buying this game? Acually i don't, especially not now. I hope it gets really good in the future but for now you still can play other games like this.. a simple and charming puzzle game. Buy it on sale though, might be a little bit too expensive for the amount of content. Head Shot is a multiplayer game. It is only in Early Access but I can't recommend this game because:

-no players

-one server

-only multiplayer (can't play it because no one is playing)

I rate this game 3/10.. Very good rout, good add-on to the Vienna map!

Thanks omsi developers

10V10. Your goal is to release cute penguins onto a level, who passively move through it: they only walk forward (you don't control them), and only turn right when they bonk on something. You look down on the entire level as though you were a kid standing over a playset (think one of those Thomas the Train tables). Because of this, the game feels smaller and involves no movement around your room. If you can only play standing up, this is the perfect VR game for you. Anyway, the penguins need to pick up eggs and then exit. To guide them, you can raise or lower blocks, thereby altering the penguins' paths. There are enemies along the way who can remove your penguins. That's it! Highly polished game, clean design, good fun. For an entry-level VR user who is looking to do something besides the tech demos and partial experiences that lack progression, this fits the bill nicely. It not a visual feast, but it's charm factor is AAA.

I really love this game, and maybe when the dust settles the developer might add a way to change the color of a plant after it grows, decorate the pots with lights or add more places to put plants or keep plants that you really like. It's amazing what one developer made. I love how relaxing it is. No currency, no time limits, just smooth progress. Sometimes you just need this type of game. My only complaint is that there aren't enough variety in the succulent plants. I have a huge stockpile of small to medium green succulent plants. My hope is that eventually every word will be super unique. I know it will take time, but maybe one day. I recommend this game if you want to relax and type in silly words that turn into fast growing plants.. Even if it's short, for a novel it's quite interactive and interesting, but unfortunately I'm not a huge fan of these novel games so I didn't enjoy this as much as fan of these games.. nice story i enjoy reading it and i got all achivments so we are so cool. Alte = Isis member

Kyoko = she looks like Mai Minakami from Nichijou but.... not edgy enough. It is WAY too laggy for my taste, once you mine a lot of ore, the game tend to slow down to the point of 14-ish FPS. Fun entry in the Halo franchise and nice of MS to bring it to steam. Now, lets get Reach, ODST, and the Master Chief collection on PC. That, and nothing less, would allow me to forgive them for keeping their own creation from thier own operating system all these years. Yes, I know about Halo 5: Forge bringing the multiplayer to PC, but we need the whole package, and they have BS'ed us long enough.

HALO BELONGS ON PC.. Scoregasm looks to be fun but I wouldn't know. Tried to create a profile...says I wasn't connected to the internet (I am...) and to try again when I'm connected.

Made it through the How To Play and the first act of level 1, only to be met with EXCEPTION_ACCESS_VIOLATION error and the game terminates. Restarted and the same thing happened again when I started up Level 1.

Did a web search and apparently this is a known issue with JAVA and users of Windows 7 or Vista. I'm running Win7. Be warned if you buy this game and are running one of those two systems.
